PROFILE

Seeking a challenging position in a reputed organization where I can learn new skills, expand my knowledge,
and leverage my learnings. To get an opportunity where I can make the best of my potential and contribute to the organization's growth.

EDUCATION

Gujarat Technological University, *Bachelor Of Engeneering*   2018 – 2022
CGPA - 8.02

PROFESSIONAL EXPERIENCE

React Developer   Sep 2022 – present
For the past 1.5 years, in my role as a frontend developer at Agaiah Resource Management and Development, I have had a significant influence on the user experience and digital visibility of our projects. My primary responsibility is to convert design thoughts into user-friendly, interactive, and intuitive interfaces that appeal to our target market.
In tight collaboration with designers, backend engineers, and project managers in cross-functional teams, I have helped create dynamic websites and online apps that support the mission and objectives of our business. I have developed responsive designs and improved performance using my knowledge of HTML, CSS, and JavaScript frameworks like React to provide smooth user experiences on a range of platforms and devices.

Web Developer   Nov 2021 – Apr 2022
During my 6-month internship at Longswitch Software Solutions PVT LTD, I worked as a web developer, where
my main responsibilities included:
• Developing and maintaining web applications using HTML, CSS, JavaScript, and other web development technologies.
• Collaborating with other developers and stakeholders to identify and solve technical issues and improve overall product quality.
• Writing clean, efficient, and maintainable code that adheres to best practices and coding standards.
• Conducting code reviews and contributing to the development of internal coding standards and practices.
• Participating in team meetings and discussions to share ideas, provide feedback, and contribute to the development of new features and products.

SKILLS

• React.js   • HTML5   • CSS3

• Sass   • Bootstrap   • Javascript

• Basics of Nodejs

PROJECTS

keep Note 🔗
Keep-Note is a web-based note-taking application developed using React.js and Redux. The application allows
users to create, edit, and delete notes, as well as categorize them using tags. Keep-Note provides users with a
clean and intuitive interface that makes note-taking a breeze.
The application is built using React.js, a popular front-end JavaScript library, and Redux, a state management
library. This combination allows Keep-Note to provide a seamless user experience with fast, responsive
updates and a single source of truth for managing application state.

Quiz Application Form 🔗
Our quiz application form, meticulously crafted using React, represents a seamless fusion of
interactivity, functionality, and user engagement. Designed with a keen focus on delivering an immersive
and enjoyable experience, this form exemplifies our commitment to innovation and excellence in
frontend development.

At its core, our quiz application harnesses the power of React to create a dynamic and responsive user
interface. Leveraging React's component-based architecture, we have structured the form into modular
elements, facilitating easier maintenance, scalability, and reusability of code.

Digital Sign Pad 🔗
Digital Sign Pad is a web application built with React.js and Redux that enables users to sign documents
digitally using their mouse or touch screen. The app provides a user-friendly interface that allows users
to upload and sign documents, as well as customize the appearance of their digital signature. The use of
Redux ensures seamless state management and a responsive user experience. Digital Sign Pad is a
practical solution for businesses or individuals seeking a convenient and efficient way to sign and
manage documents online.
